

# OVER RING ACCELERATOR

**FRANK'S ENGINEERING**  
SUPPLIER TO DRIVING SCHOOLS &  
OF CAR CONTROLS FOR THE DISABLED  
**Ph: (03) 9354 0400**  
135 BAKERS ROAD, NORTH COBURG 3058

The new Over Ring Accelerator from Fadiel provides effortless, non-tiring acceleration. Those with limited dexterity can easily accelerate retaining both hands on the steering wheel for safer and greater road handling.

Acceleration is achieved by lightly pushing on the ring, the hand pressure remains constant at any speed, allowing flowing natural driving and excellent direction control on twisty roads, making precise and delicate driving manoeuvres easy to perform. Designed with adjustable sensitivity to suit the dexterity of the driver. The Over Ring Accelerator attaches to your original steering wheel without interfering with the airbag deployment.

Suitably combined with FS2001 Brake Lever
